Dr. Mosiello diagnoses and heals through his hands. As SMMC's first full-time Osteopathic Manipulative Medicine (OMM) specialist, he uses his hands to diagnose, treat, and prevent illness or injury, enhancing the body's ability to heal itself by removing mechanical strain. As a highly-trained OMM specialist, Dr. Mosiello draws on a deep familiarity with many different types of medicine to treat a wide variety of health issues, including:

- **Musculoskeletal pain (back, neck, shoulder, and extremities)**
- **Musculoskeletal symptoms related to pregnancy**
- **Migraines, menstrual pain, acid reflux disease**
- **Carpal tunnel syndrome**
- **Sports related injuries**
- **Radicular symptoms (shooting pain)**
- **Pulmonary issues (especially COPD)**
- **Chronic ear infections**
- **Scoliosis**

Three other SMMC doctors offer OMM as part of their primary care practices: **Diane Nugent, DO, Charles Parent, DO, and Sunny Raleigh, DO, of SMMC PrimeCare Family Practice.**

SMMC is pleased to welcome Dr. Mosiello to the SMMC family. For an appointment, call **467-6922**.
